45 <text>One of the most awaited products at
Drupa 2000 was the NexPress, the first product from the joint
venture between Kodak and Heidelberg. The first model, the NexPress
2100, will be available in 2001. It has a speed of 2,100 tabloid-
size color sheets per hour (approximately 4,200 letter-size pages
50 printed simplex or 2,100 duplex), an equivalent of 70 letter-size
pages per minute.

NexStation is NexPress's front-end and serves as a complete
workflow solution based on an open architecture, employing Adobe

```

Appendix II

Extreme architecture. It allows for universally accepted file formats and integrates with common workflow systems. The unique NexQ Same Edge Perfector (SEP) technology ensures a consistent, accurate color-to-color and front-to-back register by always using the same paper edge to guide a sheet. The NexQ fuser technology accommodates the entire range of paper weights without compromising press speed.</text>
